

ProQuest Health and Medical Complete

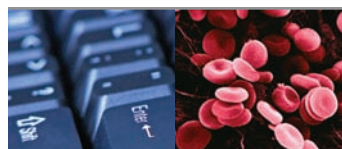

For indispensable professional and consumer health care resources, start here.

ProQuest Health and Medical Complete combines clinical research titles with hundreds of consumer and administration titles. It provides information on thousands of medical topics, with in-depth coverage from over 1,500 publications. More than 1,200 are available in full text, and over 900 include MEDLINE indexing. In addition, users have access to charts, diagrams, graphs, tables, photos, and other graphical elements essential to medical research.

An indispensable core collection of health care journals for specialized, academic, and public research environments, this database serves:

- Medical, nursing, and allied health professionals
- Planners, administrators, and professional researchers
- Consumers searching for answers to their health questions

With coverage from 1987 forward, ProQuest Health and Medical Complete encompasses gerontology, nursing, radiology, public health, health management, health marketing, physical fitness and hygiene, consumer health, and more.

For quick searches and accurate results, start here.

ProQuest's enhanced searching capabilities make it easy for both novice and expert searchers to find the information they want:

- The "My Research" feature records selected articles, previous searches, and publications visited, in a single location. Users can email documents, create bibliographies, and more.
- The "Find More Documents Like This" feature automatically displays related information on a topic.
- Powered by ProQuest Smart Search, ProQuest Health and Medical Complete displays suggested topics to aid in directing or narrowing a search for quick, optimal results.
- Citations can be formatted automatically in a choice of styles: AMA; APA; Chicago/Turabian/Harvard: Author-Date; Chicago/Turabian: Humanities; MLA; and Vancouver.
- Topics can be browsed by subject, publication title, person, company, and geographic location.
- Drop-down menus let users search by publication and document type.
- Date-range options (e.g., last seven days, last 30 days, last three months, on this date, and more) help users quickly narrow their search.
